

## INTRODUCTION

The Massachusetts Technology Leadership Council (MassTLC), the region's largest non-profit technology organization, joined the national conversation on the role that immigrants play in our economy with its submission of amicus briefs in the District Court of Hawaii and the U.S. Court of Appeals for the 4th and 9th Circuits. These briefs support the plaintiffs in those cases, who have sought to enjoin the President's Executive Orders restricting travel to the U.S. from certain countries.

While it is well understood within the technology community that diversity and the global mobility of talent and ideas into our country are critical drivers of U.S. innovation, economic growth, and global competitiveness, we felt that the submission of amicus briefs requires better documentation and sourcing of these commonly held truths. This report reflects our work to document the impact that immigrants have on our economy.

We entered this dialogue on behalf of the tech community in Massachusetts because, as a leading technology state, we feel the acute impact that immigrants have in our economy. As Governor Charlie Baker noted, "Massachusetts is a global community, and we all benefit from the shared experiences of our partners from around the world to support our economy and educational institutions [and] make our state the best place to live, work, and raise a family."

This report illustrates a rich tapestry of unique impacts across the country. We hope this compilation of research contributes to a productive dialogue about the important role immigrants play as critical drivers of our national leadership in innovation, economic growth, and global competitiveness.

We encourage readers of this report to lend their voices to the conversation and use this research to complement personal insights and experiences about the role of immigrants. We welcome broad sharing of this report and have made it freely available for download at the following URL:
